

# Fossil Record in Resins and Sediments

University of Gdańsk  
23-26 May, 2023

Initial Circular – Invitation to Gdańsk for the FossilRRS 2023

**Dear friends and colleagues,**

We are pleased to invite You to attend the palaeobiological conference "**Fossil Record in Resins and Sediments**", which will take place in **Gdańsk** from **23 to 26 May 2023**.

The International Conference is being held to celebrate  
25<sup>th</sup> Anniversary of Museum of Amber Inclusions University of Gdańsk.

The conference's primary goal is to gather all palaeontologists around the amber case, spread amber knowledge, and share amber know-how. FossilRRS is for those, who study fossils in resins and those, who want to know fossil resins better. We would like you to see our conference as a chance to link different aims of palaeontological studies and focus them on a fossil resins record. We especially count on the participation of those palaeontologists, who do not work with amber (yet), but want to share their fossil research experiences with researchers of the amber-based area.

For more information check out frequently our website **[amberfossil.ug.edu.pl](http://amberfossil.ug.edu.pl)** – we will officially start updating important details in the second half of November. You should also expect the 1<sup>st</sup> Circular at that time.

We are still adjusting details, but please save the dates: **23-26 of May 2023** to visit Gdańsk and let's celebrate together the 25<sup>th</sup> anniversary of Museum of Amber Inclusions.
